

## Master Class 2 “In the hall of the Mountain King”

Let yourself be inspired by the wondrous, amazing and fascinating world inside the mountains, where gemstones came into being long ago, where gold and silver meander through the rocks in long-stretched veins.

The day begins with a presentation on mountains, minerals and gemstones. After that we will work with the sewing machine using fabrics that were specially dyed for this occasion. This will be done using the free-motion technique; therefore it is important that you have experience with this technique.

In the second part of the day we will add many small coloured crystals, thereby creating a glistening reproduction of the inner mountain world.
